

The Hindu Civilization, an Archeological View
by Potluri Rao In Seattle ©2018 (CC BY 4.0)

The original Hindu civilization (Hinduism) was a logic-based peace-loving civilization that existed in India for tens of thousands of years. It is now lost. It was deliberately and totally destroyed by the Greeks. It was replaced by the ignorance-based European civilization (Brahminism) introduced by the Greeks to rob India.

The Hindu and European civilizations were the exact opposites. What is currently known as Hinduism is in fact Brahminism. Hindu civilization (Hinduism) before the Greeks was a Scientific Method, not a religion. The current India civilization after the Greeks is the ignorance-based European religion, worship of fictional gods and demons with supernatural powers, the exact opposite of Scientific Method.

Idolatry was a Greek invention. Idolatry is the blind worship of fictional gods with supernatural powers. It was the epitome of servitude. It was a tool of powers that be to enslave. In India, before the Greeks, there was no archeological evidence of idolatry.

Gods and Brahmin were alien to India. They were introduced by the Greeks. They were falsely attributed to antiquity. Real Brahmin lived only in Kashmir, not India. They were the Greek mouthpieces. They invented the fictional stories of gods to promote idolatry. People in India who claimed to be Brahmin were impostors, the Greek stooges, who were employed in the Greek run temple business to rob India.

The Indian version of the Greek idolatry was Brahminism. Brahmin were the Greek mouthpieces. Brahminism (ignorance) is the exact opposite of Hinduism (logic).

Hinduism was pure logic. It never had a god (dogma, blind faith). All knowledge was subject to logical scrutiny, nothing was sacred. It had only textbooks on logic, no sacred texts. The so-called Hindu sacred texts are the recent Greek rubbish (Brahminism). They were falsely attributed to antiquity to ensnare the gullible Indians to servitude.

An analysis of DNA samples of the Indian populations has an entirely different story of the Indian history. It is the exact opposite of what is currently taught in the history books.

Humans evolved in the Central Africa 200 thousand years ago. Sixty thousand years ago, a subgroup evolved into an advanced logic-based civilization. They were visionaries and adventurous pioneers who wanted to explore the new worlds. They

voluntarily left Africa and moved to a perennial lake around the Mt. Trikuta in the Vindhya. The inexhaustible supply of rainwater at the Trikuta was the magnet that attracted the logic-based African visionaries. They were the cream (intellectuals).

People who share the same DNA are called a Haplogroup. Haplogroups are categorized from A to Z.

The advanced logic-based civilization that voluntarily left Africa sixty thousand years ago was the F group. The people at the Trikuta were subgroups of the F: H, O, and J2b. They followed different rivers to reach the Trikuta, the headwaters. They lost all contact with Africa and evolved as a separate category of humans. They were the exact opposite of the civilizations that evolved in Africa. They left Africa sixty thousand years ago. They were an advanced logic-based civilization before they voluntarily left Africa.

The people at the Trikuta were the native Indians, Hindu. They were the F (H, O, J2b). They were the only people on the subcontinent. The Trikuta was the only source of perennial rainwater on the subcontinent. Ancient India was only the Trikuta.

The native Indians (Hindu) were compassionate and lived in peace and prosperity. They never had a war. They never had the concepts of King, War, God, or Idolatry. They were democratic republics with open borders. They respected other peoples' rights and property. Peace and prosperity with fair trade was their political philosophy. They lived that way for sixty thousand years until the Greeks deliberately and totally destroyed their civilization. The logic-based Hindu civilization of sixty thousand years is now lost.

Six thousand years ago, a new category of humans evolved in the Russian Steppe. They are the Europeans. During the ice age, the Steppe was covered with glaciers. The ice melted only recently and the European civilizations evolved only six thousand years ago. They evolved from the primitive humans who followed animals to the Steppe.

Unlike the peace-loving native Indians at the Trikuta, the Europeans evolved to rob each other for survival in the harsh Steppe climate. Getting rich by robbing other people was their political philosophy. They were constantly at war. They were ignorance-based primitive humans, logic was beyond their comprehension. It was their animal survival instinct to destroy all other forms of civilization. The warmongering Europeans invented the concepts of King, War, God, and Idolatry to enslave people.

The category of humans who evolved in the Steppe, only six thousand years ago, are the Haplogroup R1. The R1 was split into the subgroups: R1a, R1a1, and R1b.

The R1a were the Eastern Europeans. The R1a1 were the Central Europeans, Persians. The R1b were the Western Europeans, Greeks and British.

Six thousand years ago, humans lived at only three locations: Africa, Trikuta, and Europe (Russian Steppe). They had nothing to do with each other. They evolved as independent categories with no interaction. They were geographically isolated. The only thing they had in common was the human form.

Four thousand years ago, there was a global drought that lasted for almost two hundred years. It rearranged the human history. People scrambled to relocate to places with reliable water resources. The Eastern Europeans (R1a) moved south to Kashmir. The land from the current Kashmir up to Delhi was called Gandhara. Kashmir and Gandhara were separate regions. The R1a moved to both Kashmir and Gandhara. There was no reliable water source to the south of Delhi, until the Trikuta that was 500 miles away.

The Central Europeans (R1a1) moved south to Persia (Iran). They did not move to Kashmir or Gandhara.

Brahmin were a subgroup of Persians (R1a1). They were a cult. They were delusional. They believed that they acquired supernatural powers through meditation (tapas). They were considered uncivilized, unworthy of living in a civilized society, and were expelled to Kashmir. Brahmin, the R1a1 refugees, lived only in Kashmir, not Gandhara. They were insignificant in number. They lived in segregated enclaves.

Four thousand years ago, the native Indians (F) lived only at the Trikuta, the R1a lived only in Kashmir and Gandhara, and the R1a1 refugees lived only in Kashmir. Gandhara and the Trikuta were separated by a 500 mile wide wasteland with no reliable water source to support human habitation. The R1a in Gandhara and the F at the Trikuta were unaware of each other.

The current Indian political boundaries that include Kashmir and Gandhara was a recent Greek invention, to cover the combined land occupied by the Greeks. It was the area robbed by the Greeks with idolatry. The ancient India was only the Trikuta.

The R1a in Gandhara and the F at the Trikuta were the exact opposite civilizations. They were unaware of each other until the Greek occupation. The R1a of Gandhara moved to Trikuta to follow the Greeks.

At present, the R1a DNA samples are found only in Gandhara, to the north of Delhi, and near the Patna city (Bihar State), the former headquarters of the Greeks at the Trikuta.

At present, the R1a1 DNA samples are practically nonexistent to the south of Delhi. The delusional Persian refugees (Brahmin) lived only in Kashmir. A few were scattered in Gandhara in a location called the Kanyakubja, the former Greek headquarters.

The people in India who claim to be Brahmin have nothing to do with the Kashmir Brahmin (R1a1) who were financed by the Greeks to vandalize all the logic-based Hindu literature to worship manuals of fictional gods with supernatural powers.

The Greeks moved to Kashmir around 200 BCE. They moved to Gandhara around 200 CE. They moved to the Trikuta around 500 CE.

All the books invented after 200 CE, composed in the Kashmir Sanskrit (Panini), were financed by the Greeks to deliberately and totally destroy the Hindu civilization at the Trikuta. There was no archeological evidence of idolatry in India before the Greeks.

Brahmin, gods, demons, afterlife, kings, wars, and idolatry are a telltale evidence of the Greek financed vandalism invented to destroy the Hindu civilization of the last sixty thousand years that existed only at the Trikuta.

The Uttara Ramayana (500 CE), Bhagavata Purana (500 CE), Brahma Vivarta Purana (700 CE), Yajur Veda (200 CE), and the Epic Mahabharata (200 CE) were the Greek financed vandalism. All of them were falsely attributed to antiquity. Kashmir Brahmin (R1a1) never had intellect or logic. They were fiction writers for hire. They were Greek mouthpieces. Logic was beyond their comprehension. They trashed the Indian logic of sixty thousand years to worship manuals of fictional gods with supernatural powers to promote the Greek idolatry. They wanted the Greek money. They were the paid thugs who assassinated the Hindu civilization.

Brahmin (R1a1) of ignorance were the exact opposite of Hindu (F) of logic.

Hinduism, the original Hindu (F) civilization of logic, that existed at the Trikuta for sixty thousand years is now lost. It was replaced by the recent Greek financed Brahminism (R1a1) of gods and demons with supernatural powers.
