Four thousand years ago, there was a global drought that lasted for almost 200 years. Some Europeans moved south to Bactria in search of water. The Eastern Europeans (DNA R1a) moved to North Bactria. Some of them, called Sindhus, moved south to the Indus River. Some Central Europeans (DNA R1a1) moved to South Bactria (Avesta). Some Avestans were split into two groups: Parsis (R1a1) and Brahmins (Z93). They had no temples or idolatry.

Parsis offered prayers to nature, called Yasna, as an expression of gratitude. Brahmins were con artists. They invented fictional gods in human form, called Vishnu, Shiva, and Indra, as miracle makers. They marketed the gods as snake oil. To rob Avestans, they invented fictional sacrificial rituals, called Yajna, to invoke gods to perform miracles on demand. The Avestans expelled Brahmins to Kashmir for their unethical and immoral social behavior. According to an Avesta inscription discovered in 1935, Brahmins were expelled around 500 BCE. Parsis vacated Avesta and moved to India after the Muslim occupation. The Parsis and Brahmins of Avesta were recent refugees in India.
