The current version of Indian history was written by people who were ignorant of Hindu History, Geology, Geography, and Culture.

The West Side of India was protected by an impregnable mountain range with only two ports of entry: (1) Baloch used by Hindu (DNA F), and (2) Khyber used by the recent European immigrants (DNA R1a).

North Bactria were the European warmongering DNA R1a. They moved to the Indus tributaries, Sindhu. The South Bactria (Avesta) were Persians. Avestans were two groups called Asura (R1a1) and Deva (Z93). Asura expelled Deva for robbing them with fictional rituals called Vedas and Yajna. The Deva refugees, called Brahmin, followed the R1a to Kashmir. They were the Greek stooges that invented the fictional stories of Indian history. Grandhika was the language of Hindu (F).

Sanskrit (Avestan + Grandhika) was invented by the Greeks to trash the logic based Hindu Grandhika literature to non-verifiable and nonsensical Sanskrit Brahmin rubbish.
